

Asset Tracking

An IoT solution to precisely track anything, from anywhere.

Gartner predicts IoT to have over 10 billion connected devices by 2020. It's a tremendous growth area. One of Synapt's offerings is Asset Tracking, an intelligent IoT solution that minimizes risks associated with high-value assets through enhanced remote management.

WHAT IT DOES

Smart Tracking makes use of cutting-edge IoT technologies and open standards, and delivers an unmatched user experience. IoT sensors and detectors, such as GPS for location and MEMS sensors, are attached to every asset that needs to be tracked. Data from these sensors are transmitted in real time to a remote management app available for smartphones as well as computers. The app makes it easy to accurately track every aspect of the asset.

KEY FUNCTIONALITIES

- ▼ Locate your assets anywhere, anytime
- ▼ Ensure the safety and security
- ▼ Enhanced fleet management and shipping
- ▼ Monitor health of animals being tracked
- ▼ Identify hazards in vicinity with sensors
